DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of species A in Paper No. 5 is acknowledged. The applicant has traversed the examiners grouping of the species, the applicant alleges figures 3-8b are one species and figures 9-13b are another species. However the examiner has used the applicants specification, drawings, as well as the brief description of drawing to structure the original species presented to the applicant and since the applicant himself refers to them as a different embodiment and adds certain limitation to certain embodiments the original grouping of the figures presented in Paper No.4 will remain.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1, 8, 7, 13, 16, 21, 23-27, 29-32 are rejected under 35 U.S.C. 102(b) as being anticipated by US Patent No.5817047 to Osborn III et al.

Osborn teaches a syringe with a hollow syringe barrel, a plunger member with a plunger shaft and piston and a corrugated sheathe 100 enclosing an encircling a portion of the plunger shaft.

3. Claims 1, 8, 7, 13, 16, 21-32 rejected under 35 U.S.C. 102(e) as being anticipated by US Patent No.6475193 to Park.

Park teaches a syringe with a hollow syringe barrel, a plunger member with a plunger shaft and piston and a corrugated sheathe 100 enclosing an encircling a portion of the plunger shaft. The corrugated sheath is molded to a plunger handle member.

Response to Arguments

4. Applicant's arguments filed 7-16-2003 have been fully considered but they are not persuasive.

a. Applicant alleges Osborn lacks a piston however it does contain a piston at the en of plunger 30 the piston tapers outwards.

b. Applicant alleges Osborn's plunger shaft handle member is not molded or Park does not teach a permanently attached syringe barrel handle; When the reference teaches a product that appears to be the same as, or an obvious variant of, the product set forth in a product-by-process claim although produced by a different process. See *In re Marosi*, 710 F.2d 799, 218 USPQ 289 (Fed. Cir. 1983) and *In re Thorpe*, 777 F.2d 695, 227 USPQ 964 (Fed. Cir. 1985). See also MPEP § 2113.

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US Patent Pub no. 2003/0009135 to Fitzgibbon et al.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roz Ghafoorian whose telephone number is 703-305-2336. The examiner can normally be reached on 8:30am-4:30pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Casler can be reached on 703-308-3552.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-0858.
